

Small Cap Core: Performance & Commentary

PERFORMANCE SUMMARY

The strategy returned 0.17% before fees (-0.08% net of fees) in the fourth quarter of 2024, compared to the 0.33% return for the benchmark Russell 2000 Index. The market saw significant volatility during the quarter driven by a post-election boom for small caps that was short lived as the market refocused on Fed commentary and action on interest rates following the December meeting. Despite the somewhat flat returns in Q4, the strategy exited the year having returned nearly 16% for 2024, well ahead of the 11.5% return for the Russell 2000 index, and marked the 5th consecutive year of outperformance relative to the index.

Stock selection was a headwind to the performance of the strategy during the fourth quarter and was most impacted by Technology (Electronic Equipment Instruments & Components and Software), Health Care (Providers & Services and Equipment & Supplies), and Consumer Discretionary (Household Durables and Specialty Retail). This was partially offset by positive performance in Financials (Banks and Capital Markets), Energy (Equipment and Services), and Industrials (Professional Services and Machinery).

Sector allocation was a positive contributor to the strategy's performance during the quarter, primarily due to our overweights in Industrials and Technology as well as our underweights in Health Care and REITs.

MARKET OUTLOOK

The Fed made its third interest rate cut of the cycle, lowering the Fed Funds rate by 25bps at their December meeting. The market did not respond well to the Fed's new commentary on the extent and timing of future rate cuts which implied that cuts could come at a slower pace in 2025 than previously anticipated. While the economy and job market remain resilient, concerns about sticky inflation and increasing bond yields offer some caution.

Achieving a soft landing would lead to a favorable setup for small cap stocks for several reasons. First and foremost, we believe that a soft landing will help contribute to a better earnings growth environment for small caps which should be a significant catalyst to stock price appreciation. In addition, we note that small caps are overexposed to the domestic economy, trade at a discounted valuation to historical levels (and to current large cap stocks such as the Magnificent 7), and that historically, Fed interest rate cuts tend to be positive for small cap stock performance.

The strategy continues to have its largest overweight in Industrials as we see secular tailwinds created by government stimulus as well as trends around reshoring, automation, electrification, and data center growth. The largest underweights are in Real Estate due to our focus on companies who reinvest in their business versus paying dividends; Healthcare, as we tend not to own higher risk biotechnology companies, and Communication Services, which contains more lower quality businesses.

STRATEGY OVERVIEW

Benchmark:	Russell 2000
Inception Date:	October 1, 2000

STRATEGY SUMMARY

The Small Cap Core strategy uses a fundamental, bottom-up approach designed to identify underpriced securities with a strong potential for long-term appreciation. The investment process starts with a deep fundamental analysis of the universe by our sector specialists who then evaluate projected levels of cash flow return on investment to identify those stocks that provide the highest potential appreciation. The portfolio is then constructed using what we feel are the most attractive stocks by sector with a focus on risk management strategies.

Ziegler Capital Management, LLC, doing business as ZCM, claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. ZCM has been independently verified for the periods 01/01/01-12/31/23. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The MVP Small Cap composite has had a performance examination for the periods 11/01/14-12/31/23. The verification and performance examination reports are available upon request. The performance shown from inception to 11/01/14 was the performance of Missouri Valley Partners (MVP). MVP was independently verified for the periods 8/29/00 through 10/31/14 and the MVP Small Cap Core composite was examined for the periods 10/1/00– 10/31/14. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

ZCM is a registered investment advisor that became a majority owned indirect subsidiary of 1251 Capital Group, Inc, that they acquired from Stifel Financial on March 27, 2020. ZCM was formed in 1991 and has grown significantly through strategic business combinations. Through these combinations, we have expanded our investment strategy offerings and broadened our portfolio management teams to best serve our expanding client base. ZCM's CEO changed in May 2021, and in February of 2023. Please refer to the firm's ADV Part 2 for additional disclosures regarding the firm and its practices. ZCM's definition of the firm used to determine the total firm assets and firm-wide compliance includes all fee-paying and non-fee-paying discretionary and non-discretionary assets under management, including accrued income, in all strategies. Assets under Advisement ("AUA"), in the form of model portfolios provided to other financial institutions, are excluded from our definition of the firm and are provided as supplemental information. Returns are calculated in U.S. dollars and reflect the reinvestment of dividends and other earnings. Past performance is no guarantee of future results. A list of broad distribution and limited distribution pooled funds is available upon request. To obtain a GIPS report or a list of our composite descriptions and/or policies for valuing investments, calculating performance, and preparing GIPS reports, please call (312) 368-1442 or send an e-mail to letters@zieglercap.com.

Composite and Benchmark Description: The MVP Small Cap Core strategy invests primarily in U.S.-based, small company equity securities. The portfolio is diversified across all major economic sectors while maintaining sector exposure limits within 10% of the benchmark. Maximum individual position size is limited to no more than 5% of the total portfolio by market value. The strategy seeks long-term growth of capital. Dividend income is generally not a consideration of this strategy. Smaller company equity securities can carry increased level of risk and are less liquid than larger company equity securities. The benchmark is the Russell 2000 Index. The Russell 2000 measures the performance of approximately 2,000 small-cap companies in the Russell 3000 Index, which is made up of 3,000 of the biggest U.S. stocks. The Russell 2000 serves as a benchmark for small-cap stocks in the United States.

Minimum Account Size: Beginning April 1, 2018 the composite minimum was \$500,000.

Composite Creation and Inception Date: The MVP Small Cap Core composite creation date is October 31, 2014. Prior returns reflect the performance of Missouri Valley Partners, Inc. ("MVP") where the composite inception was October 1, 2000. At MVP the composite contained fully discretionary, tax-exempt, small cap core equity non-wrap accounts only.

Significant Cash Flow Policy: Beginning January 1, 2015, portfolios with significant cash flows are excluded from the composite. Cash flows of 10% or more are considered significant.

Internal Dispersion: The internal dispersion is measured by the standard deviation across asset-weighted portfolio returns represented within the composite for the period. If there are less than 6 portfolios in the composite for the entire year, the internal dispersion is not statistically meaningful and is presented as N.A. All risk measures are calculated using gross-of-fees returns.

Fees: Gross-of-fees returns are presented after trading expenses and before management fees. Net-of-fees returns are presented after model management fees for a \$10 mm portfolio applied on a monthly basis. The highest applicable management fee was 1.00%. Fees are calculated separately for each portfolio, and therefore, performance may differ from one portfolio to another. The effect of fees and expenses on performance will vary with the relative size of the fee and account performance. For example, if \$10 million were invested and experienced a 10% compounded annual return for ten years, its ending dollar value, without giving effect to the deduction of the advisory fee, would be \$25,937,425. If an advisory fee of 1.00% of average net assets per year for the ten-year period were deducted, the annual total return would be 8.95% and the ending dollar value would be \$23,565,266. The fee schedule is: 1.00% on the first \$10 million and 0.90% on all additional assets.

Other: Strategy assets include all assets in MVP Small Cap Core strategy, even those portfolios that are excluded from the composites because of significant cash flows or for other reasons, and include non-wrap, wrap and UMA assets. This is presented as supplemental information.

Disclosures

This review is for institutional advisory clients of F/m Investments. The strategy review often expresses opinions about the direction of market, investment sector and other trends. The opinions should not be considered predictions of future results. The information contained in this report is based on sources believed to be reliable, but is not guaranteed and not necessarily complete.

Information contained herein is for informational purposes only and is not a recommendation to buy or sell any security. Contribution to portfolio return is calculated by multiplying the total return for the security by its average weight in the portfolio. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed do not represent an account's entire portfolio and in the aggregate may represent only a small percentage of an account's portfolio holdings. A complete list of all holdings is available upon request. It should not be assumed that recommendations made in the future will be profitable or will equal the performance of the securities represented herein. Other factors may impact overall performance for different accounts including the execution and timing of trades and any wrap sponsor's policies.

All investments involve risk, including loss of principal, and there is no guarantee that investment objectives will be met. Equity securities are subject generally to market, market sector, market liquidity, issuer, and investment style risks, among other factors to varying degrees. Equity securities may rise and decline in value due to both real and perceived market and economic factors as well as general industry conditions. Small capitalization stocks are likely to be more volatile in price and carry a higher risk of failure than large capitalization stocks. Indices are unmanaged, do not reflect fees and expenses and are not available as direct investments.

Russell 2000 - Measures the performance of approximately 2,000 small-cap companies in the Russell 3000 Index, which is made up of 3,000 of the biggest U.S. stocks. The Russell 2000 serves as a benchmark for small-cap stocks in the United States.
